

Hi, I am deaf person, and I am writing to expressing my feeling and prepectives toward VRS. I am very happy that they have this wonderful VRS system. I am alot easy to communicate though VRS, and 10 time faster than TTY. Please do not mess up with those companies who made VRS system for all deaf and hard hearing people. I believe this is one of the best way to have a smooth communication, and closest possible to the hearing world. I appreciate your time read this comment. Thank you.
